Smart App Phone Book directory.

1. When we pick a contact the 1 should be replace with company name or contact name
2. Is the pick button working? Seems to get phone only.
3. Are you displaying the ORG or FN after picking in the list.
4. When dialing phone can the name as well as number appear?
5. Program Vcard Share a vcard.
6. Need About Screen of 3.dots menus top Right corner HELP SHARE VISIT
7. The buttons Add Group could be moved to the More Menu
8. The Add/Delete/Duplicate Category could be done while holding down on line.
9. Add Category would add it to within the current group
10. Delete would remove entry and contact as well
11. Duplicate would create new blank with group and category created, but no data.
12. Where Add group and Add Category will need space for PROMOTE Share
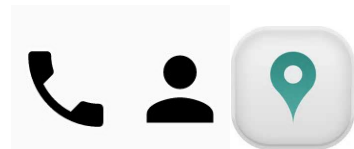

On contacts screen did you add

31. address Add

32. website Add

33. disreguar

#35 at this page we should also be able

1. Call

2. share

3. Link to google navigation

https://www.google.com/maps/dir//address/   <----address of contact

spaces need +

the // make it driving direction to

use the navigation button attached.
